Respiratory Virus 2013-2014

Respiratory Virus 2013-2014

	Rhinovirus	RSV	PIV	HMPV	Flu A	Flu B	Adeno	Combined	Total
Renal	3 (23)	4 (31)	0	3 (23)	0	0	1 (8)	2 (15)	13
Liver	10 (50)	2 (20)	4 (40)	0	0	0	0	4 (40)	20
Heart	0	0	0	0	1 (33)	1 (33)	0	1 (33)	3
Heart/lung	0	0	0	0	0	1 (100)	0	0	1

- Rhinovirus important pathogen: educate families
- Despite older age, RSV still an issue for renal transplant recipients
- Flu not frequent may be secondary to superb immunization rates
- Determine if flu cases in immunized and if house also immunized
- Determine if RSV in synagis recipients
- Determine how symptomatic infections were
